

12-Month Rolling Period

Definition (567 IAC 22.100): A period of 12 consecutive months determined on a rolling basis with a new 12-month period beginning on the first day of each calendar month.

Example calculation

Assume a permit limits an emissions unit to 6,000 hours of operation per 12-month rolling period and the unit is first operated in June of 2000. The table below details the operation schedule and the 12-month rolling total calculation.

Steps for calculating the 12-month rolling total:

- 1) For the **first** 12 months - track of the total hours for each month.
- 2) At the end of 12 months - **total** the hours of operation for the year. For the example it is 4,900 hrs/yr.
- 3) After the first 12 months - **subtract** the first month from the total and **add** the next month.
- 4) **Repeat** step 3 for each additional month.

Operation Schedule

<u># of months</u>	<u>Month</u>	<u>Hours operated (hrs/mo)</u>	<u>12-month rolling total (hrs/yr)</u>
1	June 2000	300	---
2	July 2000	200	---
3	August 2000	400	---
4	September 2000	600	---
5	October 2000	300	---
6	November 2000	400	---
7	December 2000	400	---
8	January 2001	450	---
9	February 2001	550	---
10	March 2001	450	---
11	April 2001	550	---
12	May 2001	300	4900
13	June 2001	150	4750
14	July 2001	500	5050
15	August 2001	550	5200
